

ANTONINO LO BIANCO

FULL-STACK WEB DEVELOPER | FRONTEND SPECIALIST

PROFILE

I'm currently undergoing a career change at BeCode, where I'm taking an intensive 7-month training course in web development, with the aim of becoming a fullstack developer. With solid experience as a marketing director and sales manager, I've held key positions in various fields. My career path has enabled me to develop skills in strategic marketing and sales management. I'm currently immersed in in-depth learning of React and React Native, updating my skills and broadening my knowledge of mobile development. My approach is centred on collaboration, with a critical mind and attention to detail.
